Fortem Capital US Equity Income Fund

A sub-fund of Fortem Global Investment Funds plc

Class D Distributing USD Shares

ISIN: IE00BMHKVP89

The Fund is managed by IQ EQ Fund Management (Ireland) Limited

Objectives and Investment Policy

- ~ The investment objective of the Fortem Capital US Equity Income Fund (the "Fund") is to provide investors with a total return, taking into account both capital and income returns, and which reflects the total return of the S&P 500® Index (the "Index").
- ~ The Fund aims to track the performance of the Index. The Index is comprised of US large capitalisation equities and includes the 500 largest companies, as measured by market capitalisation and covers approximately 80% of available market capitalisation.
- ~ Further details on the Index and any publications in relation to the Index, including Index constituents can be found here: <http://eu.spindices.com/indices/equity/sp-500>.
- ~ The Fund will employ a strategy of combining a portfolio of the constituents of the Index, synthetically or physically, in proportion to their weighting in the Index, with, where appropriate, an option overlay strategy with the aim of providing an enhanced level of income and the prospect of long-term capital growth.
- ~ The income will be generated from i) the dividends received from the constituents of the Index and ii) where adopted, the premiums received from the option overlay strategy, with the Index exposure also providing the prospect for capital growth.
- ~ To enhance the dividends received, the Fund may use the option overlay strategy. This involves the Fund selling short term options, over the Index in exchange for receiving option premium, whilst simultaneously mitigating the underlying Index exposure brought about by the sale of those options.
- ~ Depending on market conditions and transaction costs, the Fund may track the performance of the Index (i) synthetically by investing indirectly in the constituents of the Index through the use of financial derivative instruments ("FDIs") (on exchange and over the counter) (ii) through physical methods by purchasing the underlying constituents of the Index or (iii) a combination of both synthetic and physical methods.
- ~ To track the index performance, the Investment Manager uses a passive management approach and tracks the performance of all of the constituents comprising the Index.
- ~ The anticipated level of tracking error of the Index in normal market conditions is up to 1%. This will be disclosed in the annual and semi-annual accounts of the Company.
- ~ On demand, you may buy or sell your shares on any Business Day, being a weekday on which commercial banks in Ireland and United Kingdom (and in any other financial centre that the Directors may determine to be relevant for the operations of the Fund) are open for normal banking business.
- ~ There may be dividends declared in respect of the Class D shares.
- ~ The Fund is suitable for investors who are seeking capital growth over a minimum of 3 years and who are willing to tolerate medium to high risks due to the potentially volatile nature of the investments.

Risk and Reward Profile

- ~ The lowest category does not mean 'risk free'.
- ~ The Fund's risk category shown is not guaranteed and may change in the future for various reasons including general market developments and changes such as geo-political factors.
- ~ The risk category selected is based upon simulated historical data and is consistent with the Fund's risk profile at inception. However, any historical data may not be a reliable indicator of future returns.
- ~ The value of investments and the income from them and therefore the value of, and income from the Shares in the Fund, may go down as well as up and an investor may not get back the amount he or she invests.
- ~ The fund is rated 6 due the nature of its investments which includes the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses:
- ~ Particular risks not adequately covered by the risk indicator include:
 - o **Counterparty Risk:** The Fund may enter into over-the-counter ("OTC") FDIs with approved counterparties. If an approved counterparty defaults, there is a risk that the Fund will lose all or some of the value of that FDI.
 - o **Issuer Risk:** The insolvency of any institution that is the issuer of a Bond held by the Fund may expose the Fund to financial loss.
- o **Index-Tracking Risk:** A passively-managed fund is not expected to track or replicate the performance of its respective index at all times with perfect accuracy and there can be no assurance that the Fund will achieve any particular level of tracking accuracy. The Investment Manager will also not have the discretion to adapt to market changes due to the inherent nature of a passively- managed fund and so falls in its respective index are expected to result in corresponding falls in the value of the Fund.
- ~ The composition of an index may be changed by the reliable indicator of future returns.
- ~ **Dividends:** A significant deterioration in the level of dividends paid out by one or more of the companies comprising the Index may reduce an Investor's return.
- ~ The Fund may use total return swaps for investment purposes to gain economic exposure to the equities and the Indices. The approved counterparty may provide collateral to the Fund, including cash, US treasury bills and other high-quality government bonds with a maturity of up to 7 years.
- ~ The fund may be exposed to other materially relevant risks not adequately captured by the risk indicator. See the "Risk Factors" sections of the Prospectus of the Company and Supplement of the fund.

Charges for this Fund

The charges you pay are used to pay the operating costs of the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	No Charge
Exit Charge	No Charge

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.45%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance Fee	No Charge
-----------------	-----------

- ~ The entry and charge shown is a maximum figure. In some cases you might pay less - you can find this out from your financial adviser.
- ~ The ongoing charges figure is based on the expenses for the year ended 31st of August 2025. The ongoing charges figure may vary from year to year. The Fund's annual report for each financial year will include detail on the exact charges made. The ongoing charges are taken from the assets of the Fund and exclude:
 - o Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking
- ~ An Anti-Dilution Levy of up to 2.00% may be charged to cover the costs of acquiring or selling investments and to preserve the value of the Fund. This levy will be charged in circumstances where the Directors believe it is necessary to prevent an adverse effect on the value of the assets of the Fund and is most likely to arise if more than 5% of the NAV of the Fund is redeemed on any one Dealing Day.

For more information about charges, please see the "Fees and Expenses" section in the Fund's Prospectus and the "Fees and Expenses" section in Fund's Supplement available free of charge from the address in 'Practical Information' below

Past Performance

- ~ The Fund was established on 18 February 2025.
